'SITEPROTECT' LEASE HIRE CCTV

www.fishersecurity.co.uk/siteprotect

**HIRED CCTV SYSTEMS BROUGHT TO YOU
BY LEADING SECURITY PROVIDER FISHER
SECURITY... AT THE LOWEST WEEKLY COSTS!**

SITEprotect is brought to you by Fisher Security Ltd, as a response for the ever-growing demand for a more cost effective security solution.

SITEprotect is a hired, remotely monitored CCTV solution that does not compromise on quality. But offers the very best competitive rates along with the highest level of service. Based on cutting edge technology providing high quality images delivered promptly, efficiently and most importantly cost effectively.

WHY?

www.fishersecurity.co.uk/siteprotect

THERE SIMPLY ISN'T A BETTER ALTERNATIVE TO 'SITEPROTECT'!

Where manned guarding was traditionally prevalent in the construction and building industry, the SITEprotect CCTV security system provides a cost effective alternative. Simple to install & maintain providing excellent mobility, SITEprotect is now the preferred method of site protection for many large contractors.

With a SITEprotect hired CCTV system you can reduce your budget by up to 80%, whilst increasing the security on site.

A security officer can cost upwards of £1000.00 a week, CCTV can now be very cost effective, starting from just 0.98p per hour, it's a mere fraction of the cost of a guard.

Buying the CCTV equipment outright may well be the wrong option due to the high up front costs, not to mention the depreciation and the skilled workforce to correctly install, maintain and operate the technical equipment, which is why we have introduced SITEprotect.

Hiring the equipment is by far the best solution and Fisher Security can offer price competitive packages on like for like rentals tailored to suit your needs.

**We provide four weekly rental packages...
...but only one service level**

THE 'SITEPROTECT' SYSTEM

www.fishersecurity.co.uk/siteprotect

UTILISING THE INDUSTRYS MOST ADVANCED TECHNOLOGY.

State of the art short range compound and long-range perimeter infrared cameras will be provided to ensure quality images around the clock, day or night!

Our tried and tested cameras will provide the optimum coverage and clarity even in the lowest light levels ensuring visual verification to our own in house monitoring station. Quality comes as standard with Fisher Security, so it goes without saying that all our cameras are IP66 rated meaning they are impact and weather resistant.

Installed around the site perimeter & high risk areas...

SITEprotect movement detectors are chosen to guarantee optimum performance for your site, utilising the latest technology, for unparalleled and intelligent detection capabilities in any environment.

'SITEPROTECT' ALWAYS WATCHING...

www.fisherssec.co.uk/siteprotect

'SITEPROTECT' SYSTEMS ARE ALWAYS WATCHING AND RECORDING...

Armed or not the system provides continuous surveillance with timed recordings of all on site activity. So not only is your site secure out of hours, it also provides tamper-proof evidence of deliveries, attendance, health & safety incidents or any disputed event.

When the site is armed, should any motion be detected live site images are transmitted to our dedicated in house monitoring station using the very latest 3G & unique Wimax technology.

If the images spell trouble, fully trained & licensed SIA operators act with audio warnings to any intruders and alert the police within seconds.

Detailed incident reports and occurrences can be emailed direct to site managers, so they are kept up to date with all site activity.

SITEprotect is a powerful deterrent that's stopped hundreds of intruders in their tracks and assisted the conviction of many others.

DON'T JUST TAKE OUR WORD FOR IT!

GOLD

"Fisher security has recently installed a state of the art CCTV monitoring system at our site in Huddersfield. After vetting 3 no companies to provide this service, Fisher security was the obvious choice.

Their equipment proved to be far more superior than that provided by other companies and there off site monitoring station appears to be very professionally managed. The cost of the equipment hire was also very competitively priced.

I would definitely recommend this company to anybody who is considering this route for security, it has really changed my views on the traditional ways of securing sites and will definitely be considering this option on future schemes."

Stuart Jenkins

Project Manager
John Turner Construction

"We have used Fisher Security to install and monitor a security camera system at our site in, Clydebank.

The system in operation on our site is of excellent quality and captures sharp and detailed images of anyone on site when the system is active. The Fisher team, advised us on what they considered to be the best system for our site and then worked with us to provide the right system at the right price.

The installation was carried out quickly and efficiently and the installation team worked in accordance with their method statement and risk assessments.

In operation, the system becomes active each night and their own monitoring centre advises us immediately if anything is amiss.

I would have no hesitation in using Fisher Security Ltd again on future contracts."

Robert A Forret BSc(Hons), MCIQB

Project Manager
Muir Construction Limited

"We engaged Fisher Security to monitor our development of houses in Castleford and I have to say that the service was excellent from start to finish.

The control room staff are always courteous but above all the hired CCTV system 'SITEprotect' represented tremendous value for money.

We have gone on to use them on further developments due to the high level of service offered along with extremely good value for money.

We would highly recommend the services of Fisher Security to any companies that want a fast efficient service with no complications and great value for money."

Ryan Tilford
Strategic Team Group

"You know exactly where you stand with Fisher Security. They keep you abreast of all developments, never make promises they can't deliver on and are extremely knowledgeable.

We really can't fault them and wouldn't hesitate to use them for future projects."

David Fenner
Head of Security
Ebuyer

"Northern Marine Management changed from our previous security service provider to Fisher Security at the beginning of 2010, and Fisher Security now provide security services for all of our office and storage facilities in both Glasgow and Aberdeen. This includes security protection, alarm and monitoring functions, with full CCTV coverage and remote centralised 24 hours per day control room monitoring, along with immediate active audible (verbal, case specific) warning to any suspicious individual anywhere near our premises.

The technology applied is state-of-the-art and the service provided is exemplary in every way. The staff are very knowledgeable and customer focused, and during installation periods the work has been completed to a very high standard, right down to everywhere being left clean and tidy every day with no sign that any work had been carried out.

This, in our experience, is a level of service very rarely encountered these days. Most importantly, we now have an integrated security system that we are fully confident with."

Hugh Ferguson
Managing Director
Northern Marine Management Limited
